

How to prepare my notebook for HHL's network?

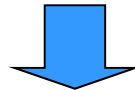

Last updated: 24/09/2010

## Remarks

- The following flow chart provides you with a first overview on how to integrate your notebook. There might be some differences within the procedure which mainly depends on the platform you are working on.
- To get more detailed information on all steps refer to [www.hhl.de/ithelpdesk](http://www.hhl.de/ithelpdesk) .

Run **netz.bat**: enter your HHL-network password when asked for  
When installing the printers type in the username this way:  
**hhl3\username**

When finished successfully, the following resources should be available:

- Network drives: [i:], [j:]
- Network printers [basement, communication-room, pool1-with-scanner, pool1, pool2, kt, pool3, pool3-color]

Change to drive [i:] folder **sophos-notebooks**: run *start.bat*
