

## Instruction: How to install SOPHOS

Department IT // Last updated: 17/08/2009

- Locate and run netz.bat on your desktop  
Remark: If the file is not present on your desktop, install it as described on <http://www.hhl.de/ithelpdesk> („How to set up printers?“).

- Open explorer and expand content of drive „J:“

- Open folder „sophos-notebook“

- Run file „start.bat“ → **Do not run: setup.exe!**

- Wait until setup completed (dark-blue shield)
