The HHL Entry Test - online

This online test is designed to help the Admissions Committee evaluate how suitable individual applicants are for HHL's part-time programs. Therefore, it measures

- numerical manipulation
- analytical modelling
- understanding and communication
- logical and critical thinking
- holistic data management
- business situation assessment.

We encourage candidates to familiarize themselves with the test format through **two free sample tests** and to take the test soon after they got invited.

The test does not measure a person's knowledge of specific fields of study. Of course, there are many other qualifications that will help you succeed in HHL's admission process – for instance job experience, leadership ability, motivation, and interpersonal skills. The HHL Entry Test does not measure these qualities. Instead, it is used as standard criterion among other, more subjective criteria, such as essays and interviews. The HHL Entry Test is an **online test** and lasts **two hours**.
